Summary

UI/Frontend Developer with experience crafting responsive, user-centric websites using HTML, CSS, JavaScript, WordPress (Visual Composer Elementor), and Figma. Developed real-time web interfaces for clients and clone projects like Airbnb and Amazon. Strong understanding of mobile-first design and UX principles, and currently upskilling in React to expand modern front-end capabilities.

Education

K.L.N College of Information Technology, Electrical and Electronics Engineering Sep2017 – Sep2021
• CGPA: 7.54/10

Experience

UI Developer, Sangvish Technologies Dec 2023 – Present
• Developed responsive web pages for various use cases including rental platforms using the Laravel framework.
• Used HTML, CSS, JavaScript, jQuery, Bootstrap, and ensured responsive performance across devices.
• Built an Amazon-style eCommerce UI in WordPress using Elementor, improving UX and mobile responsiveness.
• Designed and delivered landing pages using Visual Composer with clean UI, fast load time, and responsive layouts.

Web Developer Intern, TechLeaf Solutions Apr 2023 – Sep 2023
• Developed and maintained responsive websites using HTML, CSS, JS, and Bootstrap.
• Integrated frontend and backend using CodeIgniter, managing databases with SQL.
• Contributed to UI/UX design and implemented real-world client web apps with a focus on user experience.

Projects

Airbnb-style Rental Website – ArabicBnb (Laravel) arabicbnb.com
• Developed a responsive Airbnb-lookalike rental web page for the ArabicBnb script using Laravel framework.
• Handled HTML, CSS, jQuery, animations, and responsive layout.
• Focused on user experience and Arabic RTL design practices.

Astra Engineering Website – WordPress (Visual Composer) astraec.com
• Designed and developed a full website for a civil engineering consultancy using Figma and WordPress (WPBakery).
• Created custom page layouts and implemented them in WordPress.
• Handled both UI design and content management end-to-end.

Airbnb Clone Homepage – React (Personal Project) react-bnbclone
• A personal project built with React.js to replicate Airbnb's homepage UI.
• Practiced React components, props, state, and mobile-first responsive design.

Technologies

Frontend: React, HTML, CSS, JS, JQuery, GitHub, Wordpress, WPBakery , Elementor, Bootstrap, Figma
