- Figma
- WPBakery
- JavaScript
- Bootstrap
- Responsive Design
- Version Control

Education

K.L.N College of Information Technology, Bachelor of Engineering in Electrical and Electronics Engineering Sept 2017 – May 2021

- GPA: 7.54/10

Experience

Web Designer, Sangvish Technologies Dec 2023 – Present

- **Airbnb-style Rental Website – ArabicBnb (Laravel)** – arabicbnb.com
Developed a responsive Airbnb-style rental web page using the Laravel framework. Handled HTML, CSS, jQuery, animations, and implemented a clean RTL (Right-to-Left) Arabic layout with a focus on user experience.
- **Astra Engineering Website – WordPress (Visual Composer)** – astraec.com
Designed and developed a full website for a civil engineering consultancy. Used Figma for UI design and built custom layouts in WordPress using WPBakery. Managed both design and content implementation.
- **Landing Pages for Sangvish and Migrateshop – WordPress (WPBakery)** – sangvish.com
Created over 75+ landing pages for each website using WPBakery Page Builder. Focused on mobile responsiveness, UI consistency, parallax effects, and smooth animations. Ensured fast-loading, conversion-friendly designs across multiple product pages.
Designed and developed the complete UI/UX for the Sangvish homepage, ensuring a clean layout, engaging visuals, and optimal user experience across devices.

Web Developer Intern, TechLeaf Solutions Apr 2023 – Oct 2023

- Built responsive websites using HTML, CSS, JavaScript, Bootstrap, and CodeIgniter, integrating frontend with backend and SQL databases.
- Contributed to UI/UX design for client projects, focusing on usability and smooth user experiences.

Personal Projects

Airbnb Homepage Clone – React.js react-bnbclone.netlify.app

- Recreated Airbnb's homepage UI using React.js and Vite. Built reusable components, applied state/props, and designed a responsive layout. Deployed via GitHub and Netlify.
- Tools Used: React, Vite, JSX, HTML5, CSS3, SCSS, Bootstrap, Git, Netlify

Loan Tracker App – React.js + Firebase github.com/Ananth2k

- Built Developed a responsive loan tracking app using React.js and Firebase for real-time data handling and user authentication. Included features like borrower management, live updates, and an intuitive UI built with Bootstrap.
- Tools Used: React, Firebase, JSX, HTML5, CSS3, Bootstrap, Git, Netlify
